Safety Instructions:

- Use your expertise when lifting heavily loaded bags.
- Regularly check the integrity of the material to prevent damage or wear.
- Ensure that the maximum load capacity of 1.5 tonnes is not exceeded.
- Avoid sharp objects or chemicals in the bags to prevent damage to the material.
- Keep the bag away from moisture to maintain the integrity of the material.
- Use the lifting straps provided to avoid injury; do not lift if they are damaged or worn.
- Store the bags in a stable position to prevent them from tipping over.
- Containers should only be loaded with suitable materials to ensure structural integrity.
- The container bags are not suitable for the transport of hazardous substances.
- Dispose of the bag in accordance with the applicable regulations for plastic waste.
- Additional safety precautions should be taken for use in high-bay racking systems.
