Article Numbers: 141178, 141177, 141176, 141175

Safety Instructions:

- Risk of suffocation due to improper handling of the product. Avoid misuse, especially by children. Children should not use the chair unsupervised to prevent accidents.
- Risk of slipping on smooth floors without suitable castors. The castors are only designed for use on suitable floors; check the floor type before use.
- Risk of injury from incorrect height adjustment. Care must be taken when using adjustable elements. If there are problems with the height adjustment or mechanics, do not repair them yourself but contact a specialist.
- Maintenance required to ensure that all mechanisms function correctly. All parts must be correctly assembled before use.
- Long periods of sitting can lead to tension. Regular breaks and exercise are recommended. Avoid sitting for long periods (over 8 hours) to prevent health problems. Please adjust the seat height to ensure optimum posture.
- Use the height-adjustable lumbar support for lumbar support.
- Armrests are height and width adjustable. Users should adjust the setting to suit their height. Do not stand or lean on the armrests or backrest.
- The material of the chair can create uncomfortable conditions in high temperatures and humidity and should be used in air-conditioned rooms if possible.
- Avoid using the chair on uneven floors to minimise the risk of tipping over. For optimum safety and stability, use on a level surface.
- The user's weight should not exceed 110 kg to avoid safety risks. Do not use beyond the recommended maximum load of 110 kg.
- As a precautionary measure, check the chair regularly for signs of wear or damage.
