Safety Instructions:

- Safety information on the height of the backrest: The backrest is height-adjustable and should be adjusted to the user's height before use.
- Pay attention to the recommended sitting time: The recommended sitting time is 8 hours to avoid health problems caused by overloading.
- Safety double castors: The chair is equipped with load-dependent braked safety double castors, which ensure that the chair does not roll away when the user is not seated.
- Maximum load: The chair can be loaded up to 110 kg to avoid overloading, which could affect the safety and stability of the chair.
- Make sure that the chair is used on a suitable surface, here especially suitable for carpeted floors.
- The installation instructions should be followed to ensure the safety and functionality of the product.
- Use of recycled materials: Please note that the office chair is made of recycled plastics. Improper disposal could cause environmental problems.
