Safety Instructions:

- Make sure that the drawer cabinet is placed on a stable and level surface to prevent it from tipping over.
- Check the double pull-out stop regularly to prevent several drawers from being pulled out unintentionally and to ensure safe operation.
- Maximum load capacity of the drawers: 75 kg for smaller drawers and 200 kg for larger drawers. Do not overload to avoid injury and damage.
- Avoid excessive weight and adhere to the recommended load capacity to prevent structural damage.
- Before use, ensure that there are no loose or damaged parts to avoid injury.
- Keep the cabinet away from flames and extreme temperatures to prevent material damage.
- Close the drawers completely when the cabinet is not in use and do not insert any body parts between the drawers to avoid injury.
- Children should not have access to the drawer cabinet to prevent injury.
- Only use the drawer cabinet for its intended purpose, e.g. for storing tools or stored goods, and observe the safety instructions included in the scope of delivery.
