Safety Instructions:

- Ensure that no small parts are within reach of children to avoid the risk of suffocation.
- Always place the firefighting unit and locker in a stable position to prevent them from tipping over.
- Protect cabinets and lockers from water and moisture to prevent corrosion and structural damage.
- Beware of sharp edges due to the sturdy steel construction; risk of injury.
- Only intended use (fire brigade and similar facilities); no use by children under 12 years of age.
- Regular inspection of locks, hinges and security mechanisms to ensure that they are in good working order to guarantee security.
- Observe maximum load specifications: no overloading of coat rails, shelves, hooks.
- Check ventilation openings regularly and do not block them to ensure optimum air circulation and prevent mould.
- Ensure safe assembly in accordance with the instructions to guarantee stability and resistance to tipping.
- Do not use aggressive chemicals when cleaning to avoid damaging the surface.
- Only use cylinder locks with the corresponding keys; keep the keys in a safe place to prevent unauthorised access.
- Locker stands on a stable and level surface; take care when lifting heavy loads, risk of injury to the back.
- Do not bring electrical parts into contact with water.
- Not suitable for storing hazardous substances without safety precautions.
- Observe disposal and storage instructions and safety regulations.
