Safety Instructions:

- Make sure that the locker is always in an upright position to ensure optimum stability.
- Avoid using the spindle in damp environments or in contact with water to prevent rusting and corrosion.
- The ventilation openings must not be blocked to ensure effective air circulation within the locker.
- Ensure that the sliding hooks are used correctly to prevent clothing from falling off.
- This locker is not intended for use by children, make sure that it is placed out of the reach of children.
- Read the enclosed instructions and safety information completely before using the locker or starting to assemble it.
- Take care not to overload the fireman's locker.
- Keep the locker away from naked flames and hot surfaces.
- Ensure that all products are manufactured in accordance with safety standards.
- Avoid contact with sharp edges or surfaces.
- Keep the locker dry and well ventilated to prevent the formation of mould and unpleasant odours.
- Use the coat rails and hooks safely and properly to avoid injury.
- The product should be described in a language clearly understood by users, including safety information and assembly instructions.
- Regular inspection for wear or damage to minimise safety risks.
