Safety Instructions:

- Make sure that the fireman's locker is stable and securely positioned to prevent it from tipping over.
- The locker should be placed on a stable, load-bearing surface to ensure maximum stability.
- Make sure that heavier objects are stored in the lower area of the locker to increase safety.
- Avoid overloading the compartments to ensure safety standards.
- Regularly check the stability and fastenings of the locker and doors.
- Adhere to the maximum weight limits for the coat rail and compartments to avoid overloading.
- Keep the locker dry and away from moisture to prevent corrosion.
- The ventilation openings of the locker must not be blocked to prevent mould growth.
- No use or storage of hazardous or highly flammable substances in the locker.
- Installation and assembly should be carried out in accordance with the manufacturer's instructions.
- Carry out regular maintenance and inspection for rust, mechanical damage and stability.
- Secure the doors of the locker to prevent unauthorised opening and crushing hazards.
- The locker must not be used as a support or ladder and is not suitable for private use.
- Users must read and follow the safety and installation instructions before use.
- The locker is not suitable for children under 3 years of age due to the risk of choking on small parts.
- Ensure that no sharp edges or pointed objects are accessible to avoid injury.
- The locker is intended exclusively for the storage of firefighter clothing and equipment.
- Regularly check the condition of the coat rails and hooks to ensure a secure hold and stability.
- Children should not use the locker as a toy.
