Safety Instructions:

- Make sure that the locker is stable and securely positioned to avoid the risk of it falling over.
- Avoid sharp or pointed objects in the vicinity of the spindle to prevent injury and damage.
- Assembly must be carried out in accordance with the instructions to ensure structural integrity.
- Ensure that children handle the locker under adult supervision to prevent injury.
- Before use, you should check the locker for damage and stability.
- The locker is suitable for professional use, not for domestic use.
- Keep the locker dry and free of dirt to prevent corrosion and mould growth.
- Do not exceed the maximum load of the compartments to prevent damage to the locker.
- Check the locks, latches and mechanical parts regularly to ensure that they are in good working order.
- Only use the designated compartments and holders for storing equipment to ensure safety.
- Keep access to personal valuables compartments clear to prevent loss or theft.
- Watch out for sharp edges on the steel structure to avoid injury.
- Avoid storing highly flammable materials in or near the locker.
- Ensure that the locker is placed on a stable and level surface to avoid the risk of slipping and falling over.
- Carry out regular maintenance and cleaning of the spindle to ensure safety and durability.
- Store helmet holders and hook rails in accordance with the instructions to prevent damage.
- Check the cylinder lock regularly to prevent unauthorised access.
- Do not install the product in humid or extremely hot environments to avoid corrosion.
- Observe safety instructions for handling and storing equipment and personal property.
- The operating instructions and safety instructions must be read carefully before use.
