Safety Instructions:

- Make sure that the load capacity of 180 kg is not exceeded.
- Do not use the open-fronted storage bins for hazardous goods or chemicals.
- It should only be used under the supervision of qualified personnel when moving heavy goods.
- Keep the open-fronted storage bins stable and secure during storage and transport to avoid accidents.
- The edges and corners may be sharp; wear suitable protective gloves when handling.
- Take care when stacking to avoid instability and possible injury.
- Manufacturers and retailers are obliged to provide clear safety information and instructions for use.
- There is a risk of injury if the product is used incorrectly or damaged.
- Avoid sharp edges and aggressive chemicals that can damage the material of the open-fronted storage box.
- Use the existing carrying bar and the drop handle to transport the open-fronted storage box safely.
- Ensure that the open-fronted storage box is placed on a stable and level surface to prevent accidents.
- Keep the product out of the reach of children to avoid injury.
- Before use, ensure that the support bar is correctly secured to prevent it from breaking or slipping.
- When handling the open-fronted storage box, attention should be paid to corrosion protection measures, as it is made of sheet steel.
- Due to the weight, suitable lifting aids should be used to prevent injuries caused by improper handling.
- Avoid overloading the open-fronted storage box or stacking it above the recommended stacking heights to prevent it from tipping over.
