Safety Instructions:

- Not to be used by children without adult supervision.
- Ensure that the height adjustment is secure and stable before using the chair.
- The chair should only be used on a stable and level surface to prevent it from tipping over.
- Regular inspection and maintenance of the mechanics and castors is necessary to ensure safety.
- Sitting time should not exceed 8 hours to prevent health problems.
- The office chair may only be used within the recommended load limit of 110 kg.
- Avoid improper changes to the seat height or sieve depth setting to prevent injuries.
- Ensure that no objects are stored under the chair to avoid falls or injuries.
- Avoid overloading the chair beyond the maximum load of 110 kg.
- Only use soft floor castors on carpeted floors to prevent them from rolling out.
- The product should only be assembled and used in accordance with the instructions provided.
- The chair should not be used in damp environments to avoid damage.
- Height-adjustable armrests should only be operated by adults.
- The safety instructions and user manuals should be observed.
