Safety Instructions:

- Choking hazard due to unsupervised use of cables or small parts. Children should not play unsupervised near the table.
- Risk of electric shock if the electrical functions are used incorrectly. Ensure that all electrical connections are intact and secure. Consult specialised personnel in the event of defects.
- The appliance should only be used on a stable and level surface to prevent it from tipping over. Use levelling screws if the floor is uneven.
- Open flames should be kept away from the flame-retardant material.
- Only use the product under adult supervision to prevent improper use by children.
- Do not place heavy objects on the tabletop to avoid overloading and tipping. Do not exceed load limits.
- Keep liquids away from electrical components to prevent electric shocks.
- The electric height adjustment should be carried out in accordance with the operating instructions. Only adults should operate it.
- Keep the area around the table clear to avoid falls and collisions with other furniture or people.
- Ensure cable management to avoid tripping hazards.
- Regular checks of the stability and electrical components for functionality and safety are recommended.
- Use the furniture only for its intended purpose as a desk. Do not use outdoors or in damp environments.
- Provide safety information in understandable language. Replace illegible or damaged information.
- Observe the maximum height of 1290 mm and the safe environment during height adjustment.
- The table should not be overloaded to avoid stability problems. In the event of overloading, unplug the mains plug immediately.
- Power cables and electrical components must be checked for damage. Replace damaged parts immediately.
- Avoid overloading the table beyond the permissible load to prevent mechanical damage.
