Safety Instructions:

- The cupboard must not be overloaded; observe the maximum load of 50 kg per shelf to avoid the risk of falling and tipping over.
- Ensure that the cabinet is standing on a stable, level surface to prevent it from tipping over.
- Only suitable for dry indoor areas to avoid damage.
- Observe the safety instructions for levelling in order to minimise stability risks. Only qualified personnel should carry out levelling.
- Pay attention to edges and moving parts during installation to avoid injury. Ensure that there are no sharp edges or protruding parts.
- The cabinet should only be used in the intended environment in order to minimise possible risks.
- Children should be supervised during assembly and use to avoid injury.
- Avoid overloading the doors and drawers to prevent premature wear and damage.
- The cabinet should not be placed near water sources to minimise the risk of damage and electrical hazards.
- Avoid sharp objects near the plastic slats to prevent damage.
- All parts should be securely attached before the cabinet is used.
- The cabinet doors should always be fully closed to prevent injuries.
