Please note the technical data of the products!

Article Numbers: 657177, 657176, 657175, 657174, 657173, 657172, 657171, 657170

Safety Instructions:

- Only have the product installed by qualified personnel.
- Regular visual inspection and inspection of the horizontal brace to detect signs of corrosion, wear or damage.
- In the event of damage or signs of wear, take the product out of operation immediately.
- The maximum load capacity must not be exceeded; check the load capacity regularly.
- Observe safety precautions during transport and storage.
- Only suitable for the intended use as a horizontal brace for frame trusses.
- Install and secure the horizontal brace properly to prevent structural instability and the risk of falling.
- Do not load beyond the maximum load capacity to avoid structural damage.
- Wear suitable protective equipment such as gloves to avoid injury during installation.
- Ensure that all connections and fastenings are correctly tightened.
- Not suitable for use by children.
- When used for bracing, regularly check the stability of the shelving system.
- Inform and train employees on the correct procedures to minimise risks.
- Use only with compatible frame elements to ensure structural integrity.
- Technical documentation, including risk analyses, must be documented and stored.
- Clear instructions and safety information must be provided in understandable language.
- The manufacturer or responsible person must be indicated on the product or packaging.
- The product must not have any sharp edges or hazardous materials; file down edges if necessary.
- Only use this horizontal brace in combination with the suitable S610-M18 stand.
