

Product Safety Information

Acoustic partition, for desks, foldable, sound absorber class C, cable guide, choice of sizes, sound insulation fleece, gray-melted

Please note the technical data of the products!

Article Numbers: 194185, 194184, 194183

Safety Instructions:

- Not suitable for use by children under 36 months due to the possibility of small parts.
- Make sure that the partition wall is stable to prevent it from tipping over. Ensure that the partition wall is stable so that it cannot fall over.
- Avoid contact with naked flames or other heat sources as the material is flame retardant but can still be exposed to heat. Ensure protection against the risk of fire, as the product is flame retardant but not fireproof.
- Ensure that the cable feed does not lead to a tripping hazard. During use, the cables must be properly latched to avoid tripping hazards.
- When feeding cables through, ensure that no sharp edges protrude in order to avoid injuries. Unspecified hazards due to sharp edges or corners during simple installation.
- Do not consider the use of the partition as a safety device that protects against physical hazards.
- Warning: Not suitable for children as small parts could pose a choking hazard.
- When using, ensure suitable table sizes to guarantee stability and functionality.
- Transparent foot gliders should be secured to prevent slipping during use.
