Safety Instructions:

- Enclose safety information in accordance with the operating instructions.
- Do not exceed load capacity: maximum 1380 kg with evenly distributed load.
- Do not exceed load capacity: maximum 1035 kg with evenly distributed load.
- Do not exceed load capacity: maximum 690 kg with evenly distributed load.
- There is a risk of injury or damage if used incorrectly.
- Only suitable for pallet racking with the specified dimensions.
- Regularly check the stability and load-bearing capacity.
- Ensure correct positioning and fastening during installation and use to avoid accidents.
- Before use, ensure that the wire mesh supports are undamaged.
- The product should only be used in conjunction with suitable pallet racking.
- Before use, ensure that the wire shelf supports are correctly positioned on the shelves.
- Regularly inspect the wire mesh supports for damage or wear.
- Do not overload the wire mesh supports and load them evenly to prevent them from tipping over.
- Make sure that the mesh size does not allow small objects to fall through.
