Safety Instructions:

- Ensure that the rear panel is correctly and stably attached to the upright frame to prevent stored goods from falling.
- According to DGUV regulation 108-007 (BGR 234), the rear panel is mandatory from a height of 2000 mm.
- The mesh size of 50 x 50 mm must be maintained to ensure safety.
- The spacer must be properly installed to ensure a distance of 150 mm from the rear of the frame.
- Risk of suffocation due to improper handling or falling small parts.
- There is a risk of injury due to falling stored goods if they are incorrectly installed or insufficiently secured.
- The product must be used in the intended areas and traffic routes in accordance with the safety instructions.
- Regular inspection of the lattice frame for damage and secure fastening is necessary.
- Ensure installation only on stands with a width of 100 mm provided for this purpose.
