Safety Instructions:

- Maximum load: 150 kg per shelf. Do not exceed to ensure stability.
- Ensure that the shelf is on a stable, level surface to prevent it from tipping over.
- Assemble the shelving properly in accordance with the instructions to ensure safety and structural stability.
- Use suitable personal protective equipment during assembly and handling.
- Carry out regular inspections for stability and damage to minimise safety risks.
- Store heavy objects at the bottom to increase safety against tipping.
- Keep the product away from damp or extreme environments to avoid corrosion.
- Shelf is not suitable for use by children; keep children away.
- Regularly check all connections and screws to ensure that they are tight.
- Use the shelf only for the intended applications and purpose within the specifications.
- Anchor the shelf securely to the wall to prevent it from tipping over, especially with heavy loads.
- Ensure that all installation and safety instructions are carefully read and followed to avoid potential hazards.
