Safety Instructions:

- Ensure that the maximum loads on the shelf are adhered to in order to avoid overloading and structural damage.
- The maximum recommended load of the shelf must not be exceeded in order to minimise the risk of breakage or instability.
- Before use, check whether the load-bearing capacity of the shelf is sufficient for your goods.
- The shelf may only be used in accordance with the permissible load capacities in order to avoid structural hazards.
- Avoid placing excessive load on the shelf to prevent it from tipping over or breaking.
- The shelf may only be used in specified applications.
- Ensure that the shelf is installed in accordance with the manufacturer's instructions in order to avoid risks.
- Follow the assembly instructions exactly to ensure the stability of the shelf.
- Ensure that the shelf is mounted correctly to prevent it from tipping over and to ensure stability.
- Check that the shelf supports are correctly and securely installed to ensure stability.
- Wear suitable protective equipment during installation to avoid injury.
- Observe suitable protective measures during transport and handling to avoid injuries.
- The product should not pose a risk to the health and safety of consumers.
- Wear suitable personal protective equipment such as gloves and safety goggles during installation.
- Only install and use the product on stable, level surfaces.
- Product not suitable for commercial applications, intended for private use only.
- The product is intended for use in dry indoor areas, not suitable for humid environments.
- Carry out regular inspections for stability and wear, check fastening elements.
- Ensure that children cannot play with or climb on the product.
- Protect product from sharp edges or corners, handle with care.
- Avoid sharp edges and damage to prevent injuries.
- Keep the area around the shelves clear to avoid tripping hazards.
