Please note the technical data of the products!

Article Numbers: 460372, 460371

Safety Instructions:

- Take care when lifting heavy loads: observe the maximum load capacity of 2000 kg.
- Avoid overloading the container to prevent structural damage and injury.
- Ensure sufficient stability and safety when using forklift trucks. Always use suitable lifting aids (e.g. forklift trucks) when lifting or moving the container and ensure that they are serviced regularly.
- There is a risk of injury from sharp edges and corners; suitable protective measures are required.
- Ensure that the container is stacked stably to prevent it from tipping or falling over. When stacking the containers, make sure that the stable and level surface corresponds to the maximum stacking height.
- Keep a safe distance from other people and objects when transporting by crane.
- Ensure that the container is suitable for the intended use and is not damaged before using it in operation.
