Safety Instructions:

- Do not lift heavy loads above the maximum load capacity of 1500 kg.
- When using lifting eyes, ensure that the load and the suspension comply with safety standards.
- Take care to avoid the risk of crushing when handling the container.
- Containers must be stacked securely after use to prevent tipping and falling.
- The underride height of 105 mm should be taken into account when using pallet trucks and forklift trucks.
- Only use the container for the intended applications.
- Use suitable aids such as a crane or forklift for transport.
- Maintain safe distances to avoid injuries during handling.
- The equipment used should be checked regularly to ensure that it is in good working order.
- Protect the container from damage to minimise safety risks.
