Safety Instructions:

- Observe high load capacity of up to 1000 kg. Do not overload.
- Avoid overloading over 1000 kg.
- Make sure that the stanchion frame is stable and securely stacked to prevent it from tipping over.
- When transporting with a crane, use the crane eyes properly and ensure that the crane is not inadequately secured.
- Observe the height of 100 mm for wheelchair access and check for obstacles to avoid damage.
- Stanchion frames should only be used for their intended purpose and with the correct handling.
- If stanchion frames are damaged, remove them from service immediately.
- Ensure that all safety instructions and information on use are easily accessible.
- Do not store underneath the permitted height of 100 mm.
- Only set up the stanchion frame on a stable surface.
- Keep children away from the appliance as there is a risk of injury.
- Avoid cables that could be damaged by impact or falling.
- Before use, ensure that the stanchion frame is stable and cannot tip over.
- Wear personal protective equipment such as safety goggles and gloves when handling to avoid injury.
- Ensure that nobody is standing under or near the stacked stanchion frame.
- Use suitable lifting equipment when moving the stanchion frame with crane eyes.
