Safety Instructions:

- Ensure that the installation instructions are provided in a language that is easy to understand.
- The maximum load capacity of 250 kg per shelf must not be exceeded.
- Place the product on a stable and level surface and check its stability regularly.
- Improper use may result in injury; always follow the instructions.
- Use the product only for its intended purpose.
- Pay attention to the safety instructions during installation and read the instructions carefully.
- The shelf must be correctly installed and, if necessary, anchored to a wall to prevent tipping.
- Do not overload shelves; maximum weight per shelf: 250 kg.
- The shelf should not be used outdoors or in damp environments.
- Secure sharp edges and corners with suitable protective measures.
- The product must comply with national safety requirements and bear an identification number for traceability.
- Ensure that the shelf is correctly assembled before use.
- Children and pets should not have access to the shelf to avoid injury.
- We recommend wearing protective equipment during installation to avoid injury.
- Check the shelf regularly for damage or wear.
- In the event of instability or visual inspections for wear and tear, adjust or replace the shelf.
- Take suitable measures to protect against overloading or incorrect loading to prevent tipping.
- Make sure that heavy objects are stored on the lower shelves.
- Safety instructions and warnings must be visibly affixed to the product.
