Safety Instructions:

- Assemble the partition wall in accordance with the manufacturer's instructions. Ensure that the self-assembly is carried out professionally to guarantee stability and safety.
- Make sure that the floor anchoring is available on site to ensure stability. The product must be anchored on site to prevent it from tipping or falling over.
- Only use the mounting materials recommended by the manufacturer.
- Ensure correct handling during installation to prevent injuries. Avoid containers with sharp edges or sharp components to prevent injuries.
- Keep children away from the construction site while the installation is being carried out. Ensure that children do not play with the product to avoid potential risk of injury.
- Regularly check the condition of the partition walls and the anchoring.
- Use only in noisy working environments to ensure the intended function.
- The product cannot be handled safely if it is installed or used contrary to the manufacturer's instructions.
- Do not set up near sources of fire, as the materials are flame-retardant but not fireproof.
