Safety Instructions:

- Risk of suffocation from small parts if the holders or clamps are used incorrectly.
- Fire protection: Pay attention to flame-retardant surfaces and avoid contact with naked flames. Maintain a safe distance from heat sources. Observe fire protection class B-S2, d0 in accordance with EN13501-1:2007+A1:2009.
- Installation conditions: Suitable for horizontal mounting to avoid the risk of falling and stability. Do not use free-standing if not secured.
- Observe the maximum panel thickness of the clamping device (maximum 48 mm).
- During assembly, ensure that the edge of the table is stable and follow the assembly instructions to ensure stability and safety.
- The partition wall should not be used for products that are regularly subjected to heavy use.
- Before installation, ensure that the table top is at least 21 mm thick to guarantee secure attachment of the clamps.
- Not suitable for use in child-friendly environments. Ensure a safe working environment.
- Watch out for sharp edges when handling to avoid the risk of injury.
- Regularly check the stability of the clamps and brackets for safe use.
- Check material compatibility, especially due to possible allergy risks from the types of wood used in certain clamps.
- Ensure that acoustic materials are not affected by unsuitable environmental conditions.
