Please note the technical data of the products!

Article Number: 464629

Safety Instructions:

- Observe the safety regulations: Before using the container, ensure that all requirements of the German Water Resources Act (WHG) are met.
- Observe explosion protection: The explosion-proof fan must be operated correctly in order to efficiently discharge gases to the outside area.
- Risk of suffocation: Improper handling can produce toxic gases that can cause suffocation.
- Use a safety lock: The double-wing door is fitted with a safety lock that must be used correctly.
- Observe the air flow meter: Check the air flow meter regularly to ensure that it is safe to enter the container.
- Follow the assembly instructions: The container is delivered fully assembled, but must be unloaded using a suitable crane or forklift.
