E-Mail: info@saebu.de

Please note the technical data of the products!

Article Numbers: 464636, 464635

Safety Instructions:

- Avoid contact with sharp objects or excessive force to prevent damage.
- Ensure that the gas pressure damper is correctly installed and fitted to the SAFE TANK container to prevent accidents and injuries.
- The gas pressure damper must not be used for transporting or storing heavier loads than specified.
- Keep the gas pressure damper away from children to avoid the risk of injury.
- Follow the manufacturer's instructions for safe handling, installation and use of the product.
- Avoid improper use, as this can lead to unexpected movements of the door.
- Regularly check the gas pressure damper for damage or wear to ensure safe operation.
- The use of suitable protective gloves during installation is recommended.
