Safety Instructions:

- Ensure that the table is stable and safe in all height positions, especially with a maximum load of 300 kg.
- Users should exercise caution when adjusting the height to avoid injuries such as crushing.
- Avoid injuries due to improper use, especially with manual height adjustment.
- Ensure that the table is properly assembled and stands on a stable, level surface to prevent it from tipping over.
- The table is not suitable for children; make sure that children do not have access to the table.
- Avoid contact with liquids to maintain structural integrity and prevent slipping.
- Only use the table for the intended applications and never exceed the maximum load capacity of 300 kg.
- Suitable for use in ESD areas; ensure suitable protective measures are in place to prevent ESD damage.
- When using in sensitive areas, ensure that all safety standards are met.
- Avoid use in humid or flammable environments to prevent material damage or fire hazard.
- Regularly check the functionality and stability of the height adjustment and the table to prevent wear or damage.
- Avoid standing or sitting on the work surface to minimise the risk of falling.
