Safety Instructions:

- When adjusting the working height, ensure that no body parts are trapped in order to avoid injuries.
- Observe the maximum load capacity of 500 kg to avoid stability problems and injuries.
- Ensure that the table is placed on a stable and level surface to prevent it from tipping over and wobbling.
- Ensure that the table is only used by trained personnel.
- Protect the table surface from sharp objects, oils, acids and chemicals to prevent damage.
- Regularly check the stability and strength of the table as well as the moving parts for wear.
- Only use the table for intended applications and ensure that suitable support is available for heavier machines.
- Make sure that no children play near the table, especially if heavy loads are stored on it.
- Always take appropriate safety precautions, such as the use of safety goggles and gloves when working on the table surface.
- The product is not suitable for use by children.
- Please note that crushing and pinching can occur if used incorrectly.
- Avoid overloading the table and observe the maximum height of 1080 mm and the minimum of 760 mm.
- Please observe the operating instructions before use.
