Safety Instructions:

- Observe the maximum load capacity of 150 kg. Make sure that the weight is evenly distributed to ensure stability.
- Choking hazard due to small parts: Make sure that there are no small parts lying around to avoid danger.
- Risk of electric shock: The electric height adjustment may only be operated when the table is switched off or in compliance with the safety instructions and must be protected from water.
- When using the table, ensure that it is stable and placed on a level surface to prevent it from tipping over.
- Only use in accordance with the operating instructions and maintain regularly to ensure the functionality of the electrical mechanism.
- Watch out for overheating: Do not use several electrical appliances on one socket.
- Not suitable for home use without supervision; for professional use only.
- Risk of injury: Set the working height within the specified range (720 mm to 1120 mm) and ensure that no persons or objects are in the vicinity when adjusting the height.
- Check the tabletop regularly for damage to avoid injuries caused by sharp edges.
- Provide protection against chemical or thermal effects to prevent damage to the table surface.
- Do not use for purposes other than intended during operation (e.g. not as a chair or sleeping place).
