Safety Instructions:

- Take care not to load the table above the recommended load capacity of 150 kg in order to avoid structural damage and the risk of accidents.
- Ensure that the table is placed on a stable, level surface to prevent it from tipping over.
- Activate the child safety lock and keep children away from the table to prevent unauthorised use and injury.
- Read the operating instructions carefully and observe the safety precautions.
- Avoid moving or straining the table during electric height adjustment.
- Ensure that electrical parts are properly connected and not damaged to avoid the risk of electric shock.
- Do not place any cables or obstacles in the height adjustment area.
- Observe the safety instructions for electrical appliances and only use the table in dry areas.
- Avoid the risk of suffocation due to improper handling of small parts or accessories.
- Only use the table for its intended purpose and not as a ladder, support or playing surface.
- Take precautions when using in a chemical environment to avoid material damage.
- Make sure that there are no moving parts near body parts to avoid crushing injuries.
- Check the power supply and cables regularly for proper functioning and damage.
- Only competent persons should operate electrical height adjustment and settings.
