Safety Instructions:

- Before use, ensure that the table is stable and on a level surface.
- The maximum load of 450 kg must not be exceeded in order to avoid tipping over or overloading.
- When adjusting the height, ensure a safe and stable position to avoid crushing and pinching damage.
- Take care when lifting and carrying the table to avoid injury; wear suitable protective equipment.
- Watch out for sharp edges and corners to avoid injury; take care during transport and handling.
- The product is splash-proof, but liquids must not penetrate the mechanism and it must not be used in a damp environment.
- Improper handling may result in serious injury; follow the manufacturer's instructions.
- Only for the intended activities and to be operated by adults; suitable for use in school workshops and manual work.
- When using heavy materials, always do not exceed the load capacity.
- Place suitable protective material underneath to prevent damage to the floor.
- Always ensure even and safe height adjustment; take the necessary ergonomic measures when standing for long periods.
- Carry out regular inspections and maintenance of the table mechanics.
- Read the assembly instructions and safety instructions carefully; enclose instructions for safe use and adjustment of the working height.
