Safety Instructions:

- Risk of suffocation due to improper use or manipulation of the grid tubes. The grid tubes can break or come loose if not installed correctly.
- Risk of injury when lifting or carrying heavy objects (maximum 90 kg). During installation, ensure that the shoulders are correctly positioned for heavy loads to prevent injuries.
- Excessive weight can affect the stability of the table. Care should be taken to ensure that no heavy objects are loaded onto the table to avoid overloading. Maximum load capacity: 90 kg. The product may only be used with a load capacity of up to 90 kg, exceeding this can lead to danger.
- Ensure that the fastening screws are securely tightened to prevent accidents. Tighten screws securely to prevent loosening during use. Fastening with screws should only be carried out by qualified personnel to ensure safety.
- Keep a safe distance from other furniture to avoid injury.
- Please observe the ESD protection precautions when handling electronic components in order to avoid electrostatic discharge.
- The products are not suitable for children as they are not suitable for children and may present a risk of injury. Not recommended for safe use by children under 12 years of age.
- Users should follow the specific installation instructions to ensure safe use.
