Safety Instructions:

- The box-type workbench may only be used on a stable and level surface and must be securely mounted to prevent it from tipping over or wobbling.
- The use of suitable protective equipment, in particular gloves and eye protection, is recommended.
- Do not exceed the maximum load capacity of the drawers (75 kg); avoid overloading to prevent damage or the risk of tipping over.
- Edges and corners of the workbench can be sharp, take care when handling.
- Not suitable for children or untrained persons without supervision; risk of crushing and injury.
- Avoid using the workbench in humid environments to prevent corrosion and protect from extreme temperatures to ensure longevity.
- Keep the worktop clean and free of oil and chemicals to minimise the risk of slipping.
- Ensure that no body parts are trapped when closing the drawers and avoid inserting body parts into moving parts to prevent injuries.
- Reinforced frame made of steel profiles provides stability, yet ensures safe use in accordance with operating conditions.
- Ensure safe use in accordance with the intended conditions of use and avoid improper use.
