Safety Instructions:

- Observe safe working practices to avoid injuries.
- Do not exceed the drawers' maximum load capacity of 75 kg.
- Check the worktop regularly for cracks or damage.
- Adjust the frame to the correct height to prevent it from tipping over.
- Do not open or close drawers with excessive force to avoid crushing.
- Do not use the workbench in damp or wet environments to avoid the risk of slipping.
- Choking hazard due to small parts in the drawers.
- Avoid overloading the drawers so as not to exceed the load capacity (75 kg).
- Ensure that children do not have unsupervised access to the workbench, as they run the risk of injuring themselves.
- The workbench should be placed on a stable and level surface.
- Make sure that all drawers are fully closed before moving the workbench.
- During assembly, the enclosed instructions should be followed to ensure that the workbench is assembled correctly.
- Regularly check the stability of the fixings and the height-adjustable mechanisms.
- The edges of the multiplex plate can be sharp; avoid contact without appropriate protective gloves.
- To avoid injury, avoid placing heavy objects on the workbench if they are not properly secured.
- Make sure that all drawers and doors are properly closed before using the workbench to avoid jamming.
- Work ergonomically to avoid back problems.
- Safety warning: The stability of the workbench may be impaired if used incorrectly.
