Safety Instructions:

- The shelving must be secured against tipping in accordance with DGUV Rule 108-007 (BGR 234), as the height/depth ratio is greater than 5:1.
- If used incorrectly, the shelf may fall over and cause injury.
- The maximum shelf load is 150 kg; do not exceed this load.
- The appropriate safety instructions must be observed during assembly in order to avoid injuries during assembly.
