Safety Instructions:

- Secure shelving against tipping if the height/depth ratio is greater than 5:1, in accordance with DGUV Rule 108-007.
- Do not load shelves above the maximum load capacity of 150 kg.
- Only set up the shelf on a level and firm surface to ensure stability.
- Easy to install, but follow the safety instructions before and during installation.
- Avoid sharp edges during assembly and exercise caution to prevent injuries.
