

# Product Safety Information

## **BAUER gas cylinder wall bracket GWH 140, for gas cylinders up to ø 140 mm, hot-dip galvanized, with chain safety device, various versions**

Please note the technical data of the products!

**Article Numbers:** 659958, 659957, 659956

### **Safety Instructions:**

- Only install the wall bracket on stable walls and ensure that it is stable and securely fastened before installation.
- Regularly check the condition and fastenings of the wall bracket for rust or damage.
- Always use the chain safety device and regularly check that it is functioning correctly to prevent the gas cylinders from tipping over.
- Always store gas cylinders upright, do not overload, and only store gas cylinders with a diameter of up to 140 mm.
- In the event of a leak, keep the area well ventilated and avoid contact with ignition sources.
- Store the product safely in accordance with the manufacturer's instructions.
- If the bracket or the gas cylinder is damaged, seek technical assistance immediately.
