Safety Instructions:

- Shelving must be secured against tipping if the height/depth ratio is greater than 5:1, in accordance with DGUV Rule 108-007 (BGR 234).
- Use of wall, base or head anchoring to stabilise the shelf is recommended.
- Do not load the shelf above the recommended load capacity of 250 kg per shelf and ensure that the load is evenly distributed.
- Check the shelf regularly for damaged or missing parts.
- The manufacturer's instructions and the information in the operating instructions must be observed when installing and using the shelving unit.
- Ensure that the correct height is set when adjusting the shelves.
- The shelving unit is designed for single-sided use only.
- Only use the shelf for its intended purpose to avoid injury and damage.
- Do not set up the shelf near mobile objects or on unstable surfaces.
- During assembly, ensure that all parts are properly and firmly connected.
- Use protective clothing and suitable tools during installation.
