Safety Instructions:

- Shelving with a height/depth ratio greater than 5:1 must be secured against tipping, e.g. by wall or foot anchoring or head bracing, in accordance with DGUV Rule 108-007 (BGR 234).
- Ensure that the shelf is correctly assembled and anchored to ensure stability; follow the operating instructions and safety instructions.
- Use wall anchors, foot anchors or head braces to prevent tipping.
- Cross braces should be fitted for additional stabilisation.
- The maximum load of 250 kg per shelf must not be exceeded and must be maintained with an evenly distributed load.
- Shelves are adjustable to a height of 25 mm and must be loaded evenly to prevent instability and damage.
- The shelf may only be used in the intended area of application in order to minimise risks.
- The shelving may only be assembled in accordance with the assembly instructions and specifications in order to ensure safety.
- Avoid overloading the shelf, observe the maximum load of 250 kg per shelf.
