Safety Instructions:

- Shelving must be secured against tipping if the height/depth ratio is greater than 5:1. DGUV Rule 108-007 (BGR 234) must be observed. Secure using wall or foot anchoring.
- Only use the specified load limits of 250 kg per shelf with an evenly distributed load. Ensure that shelves are loaded evenly. Avoid exceeding the load capacity.
- Set up out of the reach of children to avoid the risk of injury.
- Instructions for use and safety information that are easy for consumers to understand.
- Take care with improper use to ensure stability and safety. The product must be assembled and used in accordance with the instructions for safe use.
- Ensure careful assembly and even distribution of the load on the shelves.
- Shelves are height-adjustable in 25 mm increments to ensure stability. Please note the static loads when adjusting the height.
- Ensure that the shelves are properly installed to avoid the risk of instability or tipping.
- Attach the cross struts correctly during assembly to ensure stability.
- Enclose documentation of the installation and utilisation instructions.
