Safety Instructions:

- The tensioning strap should only be used for its intended purpose and should not be stretched excessively to avoid tearing. Maximum span: 750 mm.
- The tensioning strap is protected against UV radiation, but should not be exposed to permanent sunlight for long periods of time.
- The hooks and the tensioning strap should be checked regularly for damage or wear to ensure safe use.
- It must be ensured that the roll boxes and containers used are properly secured, as use with inferior or damaged roll boxes can lead to injuries.
- Keep the tensioning strap away from children to avoid the risk of injury.
