Safety Instructions:

- Use the chair according to the instructions and ensure that it is adjusted to a suitable height to avoid injury.
- The chair is designed for users weighing up to 110 kg. Excessive strain can lead to injury or damage.
- Make sure that no objects get between the moving parts of the chair to avoid crushing or injury.
- Keep the chair away from water and other liquids to avoid the risk of slipping and damage.
- The armrests do not provide a safety function and should not be used as support when leaving the chair.
- The recommended sitting time is a maximum of 4 hours per day to minimise health risks from monotonous sitting.
