Safety Instructions:

- In Germany, Switzerland, Austria, the Netherlands, Belgium and Luxembourg, these cabinets may not be used to store flammable substances.
- Observe the specific rules and regulations of your country.
- Self-closing doors offer increased protection in the event of fire, do not ignore this function.
- Only suitable for the storage of substances specified in the product description, especially corrosive chemicals.
- The cabinet must be installed and used correctly to avoid safety risks.
- Only suitable for non-flammable etching agents in accordance with country-specific regulations.
- Wear protective clothing and suitable protective equipment when handling aggressive chemicals.
- Keep the area around the chemical cabinet free of flammable materials.
- Ensure that the cabinet is placed on a stable, level surface.
- Carry out regular maintenance and check the safety functions of the cabinet.
- Inform all employees about safe storage and disposal procedures for caustics.
