Safety Instructions:

- Caution! The product may tip or fall over if not installed or used correctly.
- Make sure that the table on which the monitor arm is mounted is stable enough to support the weight of the monitors.
- Make sure that the height and angle of the monitors are adjusted to your sitting position to avoid neck and back problems.
- Keep cables out of the way so that they do not create tripping hazards.
- The product should be installed in accordance with the installation instructions to ensure safety.
- When using monitors with different weights, care should be taken to ensure that the heavier monitor is positioned correctly to ensure balance and stability.
