Safety Instructions:

- Storage of heavy objects on lower shelves to prevent tipping and injuries.
- Observe the maximum load capacity of the shelves: 50 kg per shelf. Total payload of the cupboard: Do not exceed 150 kg.
- Securely fasten the cabinet to prevent it from falling over; consider wall anchoring.
- Regularly check and ensure the stability of the cupboard and the shelves.
- Use the cylinder lock correctly and check its functionality regularly to prevent unauthorised access.
- Keep the cabinet away from children and out of their reach to avoid injury.
- Ensure that the cabinet is only used for its intended purpose in order to minimise damage and safety risks.
- Avoid contact with water or moisture to prevent corrosion and instability.
- The cabinet should stand on a stable, horizontal surface to prevent it from tipping over.
- Open the doors carefully and not beyond the permitted angle. Watch out for sharp edges to avoid injury.
- To protect the powder coating, do not use the cabinet near heat sources.
- Keep the cabinet closed when it is not in use to prevent unauthorised access.
- Follow the instructions and safety information during assembly to ensure correct installation.
