Safety Instructions:

- Before using for the first time, check all parts for damage and ensure that they are complete.
- Ensure that the table is placed on a stable, level surface to prevent it from tipping over.
- Do not exceed the maximum load of 300 kg to avoid stability risks.
- Do not assemble the product without instructions; follow the assembly instructions.
- Only install and use with specialist knowledge; follow the instructions when reassembling the dismantled parts.
- Electrical components may only be serviced by qualified personnel.
- Do not operate near water sources; avoid use in humid conditions to minimise short circuits and electrical hazards.
- If defects are recognised, rectify immediately or contact the manufacturer.
- Use the ESD earthing kits in accordance with the instructions to prevent electrical discharges.
- Safety instructions for use: Improper handling may result in injury due to the table slipping or tipping over.
- Only use the mechanisms provided for height adjustment; safe height adjustment only when the tables are not moved.
- Do not place any electrical devices in the area of the height adjustment motors to avoid interference.
- Table not suitable for use by children; should be kept out of their reach.
- Not suitable for persons under the age of 18, improper use may result in injury.
- Suitable for professional applications: Use only in intended industrial environments.
- Regular inspection of motors and electrical components recommended.
- Packaging note: The frame is delivered disassembled, follow the instructions when assembling.
- Warning of risk of electric shock if the electric table is used incorrectly.
- Product only suitable for indoor use.
- Material information: Steel frame with epoxy powder coating may have sharp edges, take care when assembling.
