Safety Instructions:

- Make sure that the fire alarm is tested regularly to ensure that it is working properly.
- Check the battery status regularly and replace in good time if the battery level is low.
- Do not cover fire alarms or install them in corners to avoid false alarms.
- Do not install the fire alarm in areas where it could be affected, e.g. near cookers.
- Ensure that the fire alarm is not installed in places where extreme temperatures or humidity may occur.
