Safety Instructions:

- Place the shelf securely and stably on a level, non-slip surface to prevent it from tipping over.
- Check the shelf regularly for stability, damage and wear. Ensure that all parts are present before assembly.
- The shelf must not be used as a ladder or to support people. Children should not have access to the shelf to avoid injury.
- The assembly instructions must be followed exactly. Assembly and use only by adults or with suitable supervision. Additional parts as well as attachments and conversions only according to instructions.
- Load shelves evenly, stow heavy items at the bottom to ensure stability.
- Avoid sharp edges and corners or handle with care to minimise the risk of injury.
- The shelving should only be used for its intended purpose
- do not lift excessive loads and do not place any additional load above the maximum shelf and bay load.
- Avoid use in humid environments and in the event of strong vibrations or earthquakes.
