Safety Instructions:

- Please note the maximum load capacity of 3500 kg static and 1200 kg dynamic.
- Pallets must be stacked stably and secured carefully during transport to prevent them from tipping over.
- Keep the pallet away from extreme temperatures and chemical substances to ensure its service life and safety.
- Avoid direct contact of the pallet with food, unless this is expressly intended.
- If there is visible damage, the pallet must not be used; it must be checked or replaced.
- The product should be used under appropriate storage and transport conditions to fulfil safety requirements.
- Store the product in such a way that damage is avoided and safety requirements are not impaired.
- The product must be clearly labelled, including the manufacturer's contact details and instructions for use in plain language for the safety of users.
- The product should not be used for applications that exceed the load capacity or stackability.
- The product must not be stored near heat sources or chemical substances that could affect its material integrity.
