Article Numbers: 402478, 402477

Safety Instructions:

- When stacking, ensure that the pallets are stacked evenly to avoid accidents. Incorrect stacking can damage the pallet or cause it to tip over.
- Ensure protection against mechanical damage during handling.
- Only use heavy loads for transport if the permissible load capacities are observed. Do not load the pallet above the specified load capacity of 3500 kg. Suitable for storage and transport, but ensure that the maximum static or dynamic weight is not exceeded.
- Avoid use in extreme temperatures or chemicals that could damage the pallet material.
- Have the pallet handled by trained personnel to avoid injury.
- Dispose of safely and in an environmentally friendly manner after use, as the pallet is made of 100% recycled material.
